IDENTIFIERS	Nevada; *University and Community College System of Nevada

ABSTRACT

Consisting primarily of graphs and tables, this report provides longitudinal data on degrees and certificates conferred by the University and Community College System of Nevada (UCCSN) from 1980 to 1993 and the characteristics of their recipients. Data are presented on degrees conferred by the entire system, by subject area, and by campus. For the system-wide and campus sections, data provided include degrees by institution, discipline, gender, racial or ethnic group, and subject area. Report highlights include the following: (1) 5,365 certificates and degrees were awarded during 1992-93, with 55% of these bachelor's degrees, 23% associate degrees, and 16% master's degrees; (2) 56.3% of degrees were awarded to females, a 9.7% increase since 1980; (3) 59% of doctorates and 63% of professional degrees were earned by males; (4) 81% of degrees conferred in 1993 were earned by Whites, 3.7% by Hispanics, 3.2% by Blacks, 3.1% by Pacific Islanders, and 0.8% by Native Americans or Alaskan Natives; (5) 14.8% of the degrees awarded to minority students were certificates, followed by the 13.2% associate degrees; (6) 26% of the degrees awarded were in business management, 17% were in humanities, 15% in social and behavioral sciences, 14% in education, 12% in science and technology, and 11% in health professions; and (7) in 1980, more degrees were awarded in health (16%), education (17%), and science and technology (14%) than in 1993, while fewer degrees were awarded in business and management (22%) and the humanities (13%). INTRODUCTION

The University and Community College System of Nevada (UCCSN) *Completions Report* is published annually by the Chancellor's Office of Academic Affairs. The data used to produce this document are derived from information collected for and reported to the U.S. Department of Education National Center for Education Statistics for the Integrated Postsecondary Education Data System (IPEDS) "Completions Survey."

The UCCSN *Completions Report* represents a summary of the degrees and certificates awarded by all institutions of the University and Community College System of Nevada for the period July 1, 1992 to June 30, 1993. Information is provided in the form of systemwide summary, supplemented by campus-specific data, and is presented by level of degree, discipline, gender, and racial/ethnic designation.

Please direct any comments concerning this report or requests for additional copies to the Chancellor's Office of Academic Affairs at the following address:

UNIVERSITY AND COMMUNITY COLLEGE SYSTEM OF NEVADA
COMPLETIONS REPORT

EXECUTIVE SUMMARY

- Degrees Awarded

  The six instructional campuses of the University and Community College System of Nevada (UCCSN) awarded 5,365 certificates and degrees during 1992-93[1]. More than one-half of the degrees awarded were bachelor's degrees (55%), followed by associate (23%) and master's (16%) degrees. Certificates, first professional degrees[2], and doctorates comprised the remaining share of degrees awarded.

- Degrees by Gender

  More than one-half of all 1993 degrees conferred were awarded to females (56.3%), a 9.7% increase since 1980. The majority of certificates were earned by female students (75.7%), and more than one-half of associate, bachelor's, and master's degrees were also awarded to females. More than one-half of the doctorates (59%) and nearly two-thirds of the first professional degrees (63%) were conferred to males, however. The proportion of females receiving degrees has increased in all degree types except certificates since 1980.

- Degrees by Racial/Ethnic Designation

  The racial/ethnic group receiving the greatest percentage of degrees conferred in the UCCSN in 1993 was Whites at 81.7%. Hispanics received 3.7% of the degrees awarded, followed by Blacks at 3.2%, Asian or Pacific Islanders at 3.1%, and American Indians or Alaskan Natives at 0.8%. Non-resident alien students were awarded 4.3% of all degrees conferred in 1993. The highest percentage of degrees awarded to minority students was at the certificate (14.8%) and associate (13.2%) levels.

- Principle Degree Areas

  Among all degrees and certificates conferred by UCCSN campuses, business and management was the subject area in which most degrees (26%) were awarded. An additional 17% were awarded in humanities, followed by 15% in social and behavioral sciences, 14% in education, 12% in science and technology, and 11% in health professions. This reflects a change in degree emphasis over time. In 1980

---

[1] Data sources for this report are Integrated Postsecondary Education Data System (IPEDS) "Completions Survey", 1980-1993.

[2] Degrees conferred in medicine (M.D.)

more degrees were awarded in health (16%), education, (17%), and science and technology (14%) while fewer degrees were awarded in business and management (22%) and the humanities (13%).

- During 1993, the majority of certificates were awarded in the areas of health professions (54%) and business (21%). The diversity of subject areas in which certificates are awarded has increased among all community college campuses since 1980.

- Approximately 47% of the 1993 associate degrees were awarded in liberal/general studies. The number of associate degrees awarded in this discipline has increased rapidly since 1980 (157%). Other subject areas in which the number of associate degrees awarded are rising include health professions, (41.5% increase) and business management and administrative services, (22.4% increase).

- Among bachelor's degrees conferred, business and management was the subject of choice for the majority of the 1993 graduates (32.6%). This represents an increase of 151.2% in the number of bachelor's degrees conferred in this area since 1980. Education (13.7%), health professions (7.4%), and social sciences and history (7.3%) were also popular subject areas for students receiving bachelor's degrees during 1993.

- The majority of graduate degrees were awarded in the field of education during 1993. Approximately one-third (35.3%) of master's and doctorate degrees were awarded in education, which represents an increase of 28.4% since 1980. A large number of master's degrees were also conferred in the areas of business and management (18.7%) and public administration (11.1%). Among doctorate degrees, a significant share were awarded in the physical sciences (17.9%) and engineering (15.4%).
